Summary

With over to 8.5 years of experience as an SAP ABAP Developer, I bring a proven track record in developing and optimizing SAP solutions on the S/4 HANA platform. My expertise in ERP systems and ability to lead successful project implementations have significantly improved business processes and efficiency. Recognized for my strategic approach and technical programming skills, I am eager to contribute to new and transformative projects.

Experience

Solution Architect, Lead Engineer

Harman Connected Services India Ltd/ Wipro Connected Services(Acquired)

Feb 2025 – Present

- Developing ABAP solutions and design document of requirements
- ABAP support for SAP implementation in European countries
- Providing technical input to projects delivering SAP changes to support initial project planning and estimation process
- Worked on ECC to HANA migration with Technical Remediation, Functional Remediation, SQ01, SPAU/SPDD, SQVI
- Implementing integration objects and remediating integration objects for HANA compatible space.
- Developing and implementing changes/enhancements using ABAP technology.
- Impact analysis for S4 HANA Transformation.
- Define architecture standards, guidelines, and best practices.
- Evaluate and select appropriate SAP technologies
- Collaborate with business leaders to understand strategic goals
- Review technical specifications, RICEFW objects, and ensure alignment with architecture.

Senior Consultant

Capgemini Technology Services India Ltd

Mar 2024 – Feb 2025

- Mentor and manage a small pod of developers.
- Assign tasks and projects based on skills and project needs for a major automotive manufacturer in Europe.
- Oversee resolution of incidents and service requests for MM, FI, SD, and PI modules.
- Prioritize and delegate incidents and tasks to ensure timely resolution.
- Track progress and ensure incidents and tasks meet SLA requirements.
- Handle Change and Transport System (ChaRM) requests for related SAP modules.
- Design and develop custom ABAP programs, reports, interfaces, enhancements, and forms (RICEF).
- Review and approve technical specifications and code from team members.
- Provide troubleshooting and support for integration issues.

- Plan and manage SAP development projects, including scoping, scheduling, and resource allocation.

System Development Engineer

Koch Business Solutions India

Apr 2022 - Mar 2024 (2 year)

- Enhanced custom reports and standard logic across various modules for more than 20+ Reports, FMs and Global Classes.
- Achieved up to 90% faster loading times for optimized custom reports, reducing delays in daily background jobs.
- Ensured compliance and user authorization by working on the GRC module.
- Managed Engineering Records and DMS for efficient product change notifications and MPS-related changes.
- Enhanced the existing SAP Business Client Application for processing Engineering Record to withdraw changes from certain changes which allowed the Engineering Department to reuse existing Engineering Records.
- Developed a RF program for Labelling Team which enabled the plant users to fasten the process by 70%.
- Resolved a critical issue causing an Engineering Records (ER) status blockage, preventing manufacturing delays by developing a program to reprocess the records in background where more than 164 records were stuck in production was processed.
- Successfully fixed a production issue related to the transfer of company data from SAP to the learning website, which was critical for all users to be trained and be 100% compliant with Organization's Compliance policy for which was recognized by the management.
- Resolved a long pending issue in EHS where a report submits substance test report for all materials which was causing additional expense for the company.
- Currently Upskilling to SAP Ui5 and OData process along with BTP application development.
